

## MAY THE ROAD RISE UP TO MEET YOU

“May the road rise up to meet you” is a timeless Irish blessing that embodies hope, kindness, and the promise of a smooth journey ahead. Many express similar sentiments through phrases like “Godspeed” or “May your journey be prosperous.”

Throughout our lives, we aspire for the well-being of ourselves and our loved ones. However, preparation remains paramount. Each life stage brings forth new responsibilities and transitions, from welcoming new babies and celebrating special occasions to acknowledging the eventual conclusion of our time on Earth.

This month encourages us to cherish what we have while recognizing that all things ultimately come to an end. Take a moment to contemplate the nature of your journey. While some paths may be easier and others longer, every journey reaches its conclusion.

Consider this a gentle reminder to initiate the often uncomfortable yet vital conversations with loved ones regarding end-of-life planning. By taking these steps, we honor one another with peace and clarity.

Wishing you a joyful St. Patrick's Day. — Roshay Edwards, Owner

## THANKS AND PRAISES

Our esteemed resident, Ms. Frances, exemplifies resilience and serves as an inspiration to us all. Like many, she has faced significant life challenges but has chosen not to succumb to adversity. Ms. Frances embodies independence and is a passionate advocate for her individual rights. Simultaneously, she has recognized the value of accepting assistance when needed.

Her interests include knitting, reading, sharing her devotion to Jehovah, attending worship services at the Kingdom Hall, enjoying wholesome films, and offering warm hugs. This month, let us take the opportunity to celebrate Ms. Frances and her remarkable spirit!

**WHAT IS DEMENTIA?** Dementia is a general term for loss of memory, language, problem-solving and other thinking abilities that are severe enough to interfere with daily life. Alzheimer's is the most common cause of dementia.

As the number of Americans living with Alzheimer's disease tops over 7 million for the first time, [American Perspectives on Early Detection of Alzheimer's Disease in the Era of Treatment](#) (PDF) finds that Americans are increasingly interested in early detection and treatment. The nationwide survey of more than 1,700 Americans aged 45 and older examined awareness and attitudes about Alzheimer's disease, early detection and diagnosis, tests used to help diagnose Alzheimer's, and treatments.
